## Bonsai

### Double Dwarf Fescue

BONSAI is the result of over 10years of research and breeding to produce a durable turf grass with low maintenance, drought resistance and year-round green color.

This double dwarf, turf-type tall fescue is shorter, finer and darker green than any other commercially available variety. Bonsai has drought tolerance equal to or better than any other tall fescue you can buy today. Its dwarf growth habit requires much less maintenance, less fertilizer and less mowing.

Central Coast Sod insures you fresh, locally-grown products adapted to our local weather and soil conditions. We are the experts when it comes to growing sod on the Central Coast.

	Triumph 2	Coastal Triumph	Gold Coast	Bonsai
Texture	Medium	Medium-Fine	Fine	Medium Fine
